INTRODUCTION

CRESTSAGE LIMITED

Crestsage is an indigenous Engineering services company registered in 2010 to deliver:

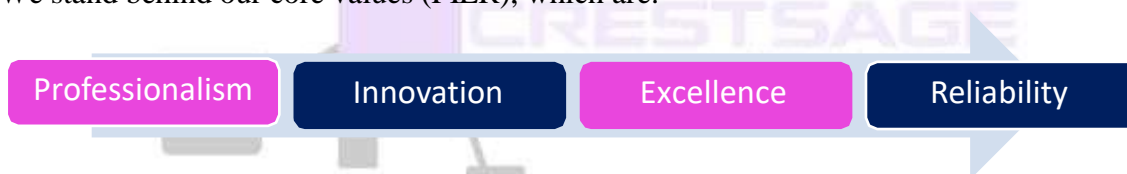

- Construction Services
- General Contracting Services
- Technology Consulting Services
- IT Systems Design and Implementation
- IT Managed Services
- Business Continuity Solutions

Our ability to provide these solutions and more is backed by over 60 years cumulative in-house experience.

We take a business focused consulting approach to understand your business needs and we design solutions to close those gaps, within a relationship which is easy to manage, trusted and flexible - making it possible for you to achieve your goals.

We understand business issues and use our experience and professional expertise to align your business needs to the right engineering solution(s), enabling an organisation to drive innovation, improve service delivery, lower costs and assure sustainability.

We stand behind our core values (PIER), which are:

THE CRESTSAGE ADVANTAGE

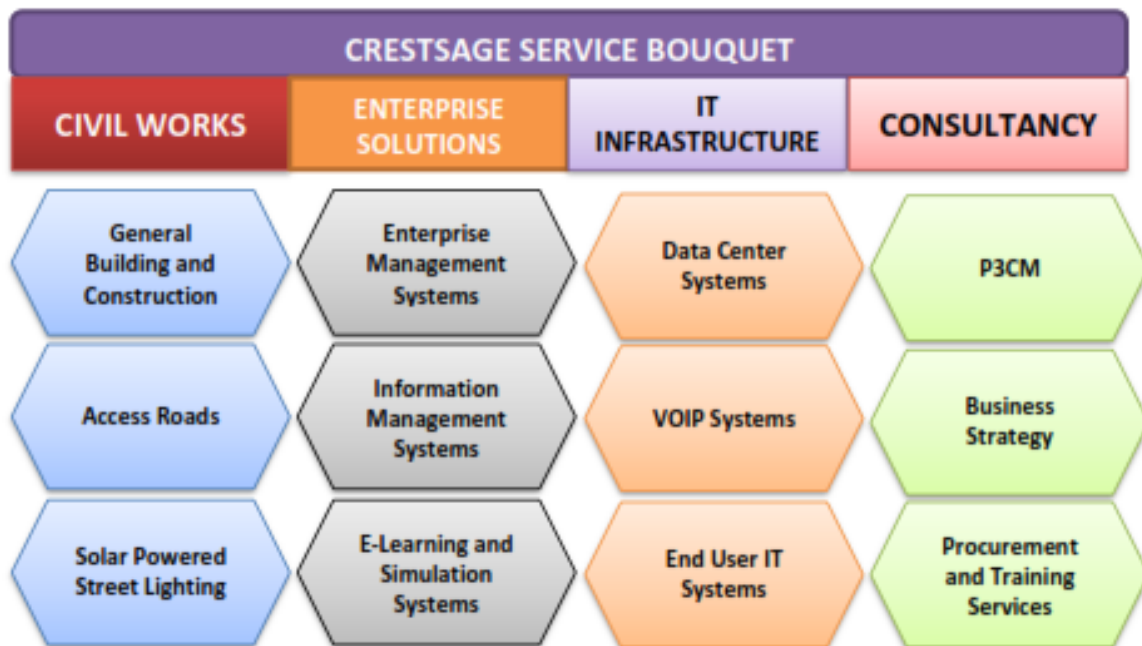

- We have valuable strategic partnerships with SDEM Erectors, Royal Niger Emerging Technologies, Salford Construction Company (SCC), Murray and Roberts Construction, Lenovo, IBM, Huawei, Microsoft, Cinfores, HP, Cisco, Dell and many more. Through these partners we are able to bring you world-class solutions at affordable prices.
- We have an in-house team of business analysts that understand how to deliver the best solutions for you, thus enriching your business improvement objectives especially in the area of engineering design, construction, learning and pedagogy.

- We back our solutions up with adequate training to ensure you get the best out of your investment
- We have significant records of success from our operations over the past 5 years working with companies of various sizes from the very large to the small and medium sized enterprise

In the last 5 years we have consulted for notable clients like ExxonMobil, Total, Aker Solutions, Diamond Bank, Ecobank, Sahara Group, Fidelity Bank, ARM Pension, Lagos State, Osun State, NSIA, Pillar oil, Ikeja Electric to mention a few.

CRESTSAGE SERVICE BOUQUET

Civil Works (Design, Installation and Maintenance)

- General Contracting
- Accessibility Solutions
- Estate Construction and Development
- Street Lighting Services

Enterprise Solutions (Design, Supply and Maintenance)

- Enterprise Management Systems: (ERP, Total One app, Fleet Management)
- Information Management Systems: (Power Monitoring System (PMS), Capacity systems, Data Management, IOT, Intelligent Identity Management Systems)
- E-learning and Simulation Systems: (E-learning modules and simulation systems)

IT Infrastructure (Design, Supply, Installation and Maintenance)

- Data Center Systems: (Data Centre, IVS, Environmental Monitoring)
- Power Systems (Uninterruptible Power Systems, Inverters and Managed Power Services)
- End-User IT

Consultancy and Training Services

- Project, Portfolio, Program and Change Management (P3CM)
- IT Strategy
- Training Services(Training in any of the service offerings or customized trainings)

CRESTSAGE CORE BUSINESS

BUILDING AND CONSTRUCTION

Crestsage Limited offers a full spectrum of construction and contracting services, from civil and building construction, to road works and maintenance. Building is one of humankind's most ancient pursuits, and the company has forged a proud track record of major developments and projects across the full spectrum of the building industry with focused, proactive and experienced teams geared up to take on large, unusual and technically complex projects.

It focuses on creating partnerships that add value and is committed to delivering projects innovatively within budget and on time - and exceeding client expectations. Sustainability is a primary focus that ensures that Crestsage Limited not only creates structures which are of benefit to society, but also leaves each project knowing that it will stand the test of time. Our construction expertise lies in the following areas:

- Construction of Access Roads
- Installation of Intelligent Street Lights and Camera systems
- Construction and Renovation of Buildings
- Estate building and development
- Provision of Building and Facilities Management
- Interlocking Paving Stones

POWER MONITORING SYSTEMS

Utilization of Power devices is a critical issue that is being undervalued, power devices are the core backbone of every day operation of homes and businesses. Monitoring and managing power devices remotely is a key factor to effective operations in any organization.

Features Of The Power Monitoring And Management Systems.

- Ease of integration with existing Power systems
- Email notifications and USSD/GPRS alerting systems
- CCTV and Image capture giving a more secured way of detecting unauthorized entry into critical areas of Power and device environment.
- Web based dissemination process to share information across multiple locations
- Customizable reports and log interface
- Power Assets and performance status
- Executive Management insight for decision making

INTELLIGENT VIDEO SURVEILLANCE (IVS)

Intelligent video comprises any solution where the video surveillance system automatically performs an analysis of the captured video, applications range from analytics such as video motion detection and audio detection to more advanced systems including camera tampering detection, people counting, virtual fences, and vehicle license plate recognition. Intelligent video is about reducing the vast amount of information contained in video, making it more manageable for systems and persons.

Huawei Intelligent Video Surveillance Solution combines a comprehensive set of video resources to create an unparalleled, standardized video information system under unified management.

Features of Huawei Intelligent Video Surveillance

- Forbidden Zone protection
- Intruder detection
- Object tracing and detection
- Identification by license plate or face
- Traffic flow management
- Cloud computing and storage management plus intelligent video analysis
- Improve efficiency by quickly identifying and retrieving video, checking image quality, and detecting and reporting image faults. The solution supports up to 20 intelligent algorithms
- Support intelligent Peripheral Units (PU) and a platform to handle pre-event prevention, during-event processing, and post-event evidence collection
- Connect to third-party platforms with the platform interconnection engine

NETWORKING (CISCO) AND MANAGEMENT

Networking is a way systems communicate effectively despite the fact that they run on different operating systems. Many businesses currently architecture their I.T approach to manage their Complexity Resource Disruptions (such as servers, storage and DC switching) also Device Location Consistency (which could include routing, switching, application, security, wireless) and lastly Integration Process Adoption which are (application, voice and video) with their budgets, expertise and challenges.

Networking enables organizations to accomplish a series of specific tasks in the management of any or all aspects relating to a company's information/data transmission and communication for daily activities.

Only network based applications deliver a quality borderless experience such as.

- Deployment agility: End-Points-Network-Cloud.
- Device and OS independent
- IT control and flexibility while meeting their expense requirements
- Solutions led-approach by identifying business issues and a path to resolving them
- Architectural assessment: map capabilities, services and solutions
- Leading practices: improve performance availability, security for operations.

OUR ENTERPRISE SOLUTIONS

- Cisco Meraki Cloud Management: Cisco Meraki is the first and only solution that provides device based security policies.
- Cisco Meraki's built-in support for BYOD makes it easier than ever to securely support user-owned iPads, tablets, smartphones, and laptops – without extra appliances, licenses, or complex VLAN configurations.
- Cisco Meraki Systems Manager provides over-the-air centralized management, diagnostics, and monitoring for the mobile devices managed by your organization.
- Software-Defined Access: Provide access to any application in minutes, without compromising on security. Gain superior awareness of what's hitting your network.
- DNA Analytics and Assurance: Streamline troubleshooting with actionable insights, Solve issues before they become issues. DNA Analytics and Assurance offers comprehensive network visibility. Network analytics and automation help you quickly resolve them, so you can increase availability and deliver a better user experience.

OUR PARTNERS/ CLIENT

PREVIOUS PROJECTS/ CUSTOMERS

With years of experience managing enterprise Engineering services, ICT led products and procedure, delivering government infrastructure, we have built advanced procurement and management interfaces that enable Crestsage deliver cost efficient products on time, to the right quality and relevant local content. We are also able to offer a streamlined approach allowing you to avoid the pit falls that can slow projects and services down especially.

Some of the services we have provided to various sectors includes but not limited to:

Civil Construction Projects: We have the capacity to deliver large construction projects and have a track record of building to last. We constructed access roads for estates such as Greenwich Estate, Enugu, Street Lighting, renovation and construction of buildings such as the PTFD building in the University of Nigeria, Nsukka, and Intelligent Solar Street Lighting Projects for Dreamland Realtors Ltd. We have also deployed several CSR initiatives as community assistance programs for Energy and Public Sector businesses across Nigeria such as Exxon Mobil and Slumberger. We have so far constructed and deployed E- Learning Centers equipped with eLearning Management Systems and eLibrary Management Systems on behalf of Exxon Mobil in 12 public primary schools across Nigeria.

The project was envisioned and implemented as a Community Assistance Program on behalf of the Erha North Phase 2 Umbilical Project.

Procurement Services: We pride ourselves with the ability to provide ‘*needle in a haystack*’ on-time procurement of technology products. We trump competition with our tenacity and strategic alliances with organisations such as Provantage, 3M, Grainger in the local market allowing us to deliver to customers.

Enterprise Solutions: We have also deployed notable software and hardware solutions in this sector. Our DWDM (Dense Wavelength Division Multiplexer) deployed for Diamond bank and OneApp logistic& warranty management mobile solution for a French multinational is worthy of note.

Security Systems: We are currently deploying Intelligent Video Surveillance Systems (IVS) and intelligent (solar) street Lighting systems for two campuses of the University of Nigeria, Nsukka.
